The top stuff doesn't accurately reflect if you are a good teacher or not, right here does. First class that I feel that you have taught me real world knowledge. Even more important I learned how to think. I suggest you have a night where you teach life to all of this University. To your boss he needs to be giving you a raise. **You are the first smart man I have had in the College of Business.** mind you I have had \*\*\*\*\* and \*\*\*\*\* for professors in two of the supplemental career preparation courses Both are great minds who have done great things but they did not teach me half of what you did. Great job!"

"I would consider graduate school at this University if this professor taught in the Grad Program. **He is hands down the best professor I have had** and wished he taught more classes. His method of teaching is different but **I have learned more in a semester in his class than all of my college career at this University.**"

"This professor is an engaging and fun teacher to have. He makes learning material easy with his reference to real world situations. ..."

"This professor uses real life examples and stories to really make concepts make sense. He takes his time explaining things thoroughly and never makes you feel dumb for asking questions. He welcomes discussion and different opinions. Some professors just talk at you, but with this professor it's a conversation. This professor is an awesome professor."

"Very straight forward."

"This professor is awesome!"

**"This professor has been my favorite professor here at this University, and also at my previous community college for that matter.** This professor was able to make me more open minded through his concepts and by bringing up unforeseen and/or potential demise. He has truly taught me ..."

"This professor has an excellent gift which intrigues every student, while leaving a lasting impression. This professor is teaching students strong **lessons which last longer than any other course I have taken throughout my time in a technical college and at the university level thus far.** His expertise, feedback, knowledge, and life lessons which are incorporated into the coursework surpass anything that a book or regular professor could express. This professor's strategy, in my opinion, would best be described as geared towards preparation for real life work, and giving students and others alike an edge in future experiences. I found this strategy extremely effective for me due to the reasoning which I find in my daily life. Several moments in my normal daily activities, personal, professional, as well as educational, I find myself applying formulas and lessons learned to my life without realizing it until later on. It has truly become a natural reflex. (Signed)"
